Filters

You are
what you
drink

Make the healthiest decision
about the water in your home
by choosing Aquasana.

Health and beauty from the inside

Aquasana Drinking Water filters offer superior performance, value and convenience.

Winner of
Health Magazine's 2011
America's Healthiest Gadgets

We're all made of more than 70% water. Clean, healthy, great-tasting water has never been more important than it is today. Traditional filtration products like pitchers aren't cutting it. They are bulky, inconvenient and only filter out basic contaminants from your water. Our award-winning drinking water filtration technology offers performance, convenience and value that are unmatched in the industry.

It's like getting 4,000 bottles of water or up to 22 pitcher filters in one product

Performance

Aquasana Claryum Filtration Technology features three distinct stages, including activated carbon, ion exchange and sub-micron filtration. This unique combination forces water under pressure over more than two million square feet of surface area of contaminant-grabbing filtration material. Claryum's selective filtration technology reduces a comprehensive list of contaminants; reduces odor; and improves the taste of tap water while also preserving its healthiest minerals such as calcium, potassium and magnesium

Cartridge A

Filters Sediment & Turbidity

- Removes microscopic particles
- Improves taste
- Greatly reduces odor

Filters Chlorine

- Chlorine is the most concentrated and competitive chemical in tap water

Cartridge B

Filters Lead

- Exchanges lead with potassium
- Maintains pH levels
- Improves taste

Filters Synthetic Chemicals

- Herbicides
- Pesticides
- Industrial solvents

.5 Micron Absolute Filtration

- Takes out cysts

Value

Aquasana is the best value, with water costing as little as 10¢ a gallon — about half that of pitcher filter water.

Convenience

Your Aquasana water is readily available with the convenience of a tap. And you only have to change the filter twice a year.

Water for Life™

Automatic Free Shipping
Filter Replacement Program
