Shower Filters

Beautiful hair and skin
begin with clean water

Make the healthiest decision
about the water in your home
by choosing Aquasana.

Treat yourself to a healthier shower

Give your family beautiful hair and skin with the Aquasana shower filter.

Everyone knows what it feels like after swimming in a chlorinated pool — dry and itchy skin, straw-like hair and red eyes. So why shower in chlorinated water?

Clean shower water is more important than you may think. Studies show that more chemicals enter our bodies through skin absorption and steam inhalation while showering than from drinking a gallon of the same water. Not to mention the fact that chlorine strips the natural protective oils from skin, causing excess drying. The chlorine added to our tap water also causes dry, dull hair, split ends and color that fades and turns brassy.

Even the best hair products are less effective when hair's natural protective oils are consistently stripped away with each shower.

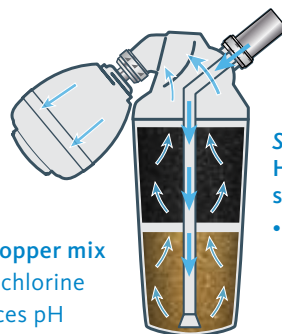

Aquasana shower filters help promote beauty benefits like softer skin and shinier, smoother hair. You also avoid health risks from inhalation and skin absorption of chemicals in shower steam. Now that's what we call a smarter shower.

Clearly better water, for your skin and hair

Aquasana's shower filter removes more chlorine for more beautiful skin and hair, satisfaction guaranteed.

- The dual-stage filtration process reduces 91% of chlorine in your shower water — nearly double the required reduction to achieve NSF certification
- The massage shower head option can be added for comfort, but can be used with your own shower head as well
- The up-flow design maintains water-pressure and shower-height
- Easy to install with filters lasting six months or 10,000 gallons
- Made in the USA

Stage 1
Zinc & copper mix

- Filters chlorine
- Enhances pH

Stage 2
High-grade coconut shell carbon

- Reduces other organic contaminants
